

KELLER is hiring:

## SERVICE TECHNICIAN (m/f) for drilling rigs and vibrocats

Based in our workshop in Atlasburg, Pennsylvania, **USA**

**KGS** (Keller Geräte & Service GmbH) is a construction machines manufacturer, based in Germany since 1860. KGS develops, assembles and repairs drilling rigs and vibrocats.

KGS is the most important service provider of KELLER Group. Its role is to secure a functioning machinery for all companies of KELLER.

**KELLER** is specialized in foundation work, geotechnical solutions and tackles the most demanding underground engineering challenges worldwide. The USA are our biggest growth market.

### Your tasks and responsibilities:

- ▶ Initial job training in KGS' workshops in Renchen (Germany) for several months to get familiarized with our drilling rigs and vibrocats
- ▶ Once and for all moved to our workshop in Atlasburg (PA):
  - **Maintenance and repair of construction machines** in Atlasburg and on construction sites in the whole US
  - Support in construction machinery **installation, start-up and demonstrations** as well as **operator trainings**

### Your qualifications:

- ▶ Vocational training and/or experience in the maintenance of motorized equipment or machines
- ▶ Electrics and electronics skills are mandatory; mechanics and hydraulics skills are optional
- ▶ Experience as field service technician; clean driving record and valid driver's license
- ▶ Full professional proficiency in English language
- ▶ Customer-oriented, reliable, motivated for a long-term engagement, willing to travel, able to problem-solve and to work independently

### Are you interested?

- ▶ Please send your application to [bewerbung.kgs@keller.com](mailto:bewerbung.kgs@keller.com).
- ▶ If you have any questions, you can contact our HR Manager Anika Schmidt (+497843709202).
